

GPM 450 Electric Creasing Machine

Features

The GPM 450 is an electric, foot pedal operated unit making the creasing or perforating of card and paper up to A2 size, a 'hands free', quick and very easy operation.

The machine is very versatile having a working width of 450mm (A2) and can be easily transformed in to a crease or perforating unit by simply changing the blade. It also has the choice of 3 crease width profile sizes for differing card stocks or for coping with problem digital print.

The unique front and back lateral paper stops allows set up of up to 4 crease positions enabling the operator to make more than one crease without having to re-position the stops for different crease positions.

Specifications

- Designed for both creasing and perforating
- Heavy Duty metal construction
- Digital and laminated documents
- High-quality "anvil" perforation
- Three sizes of creasing bars
- Large working desktop (up to A2 format)
- Foot pedal operation
- Working width 450mm
- Max. Paper weight 400gsm (crease) 250 gsm (perf.)
- Option on crease width 1.2mm/1.5mm/1.8mm
- Size L710mm x W540mm x H290mm
- Weight 39kg
- European Manufactured to ISO 9001
