

DTP 340 M

Reliable, heavy-duty, desktop punching machine. The modular design makes it very versatile for all types of book and calendar production.

RENZ SAFETY INFORMATION
MADE IN GERMANY

Customer benefits:

- Punching dies for all types of ring wire, plastic comb, coil and calendars.
- Punch a wide range of mixed stocks
- Fast die changes
- QSA (Quick Size Adjustment) for high flexibility of different paper formats: A5, A4 and A3⁰⁰
- Vertical paper feeding for precise punching
- Compact simple design, one machine can punch and bind all jobs when using Renz MBS binding modules

Maximum:

-  Width **340 mm**
-  Punch up to⁰⁰ **3.5 mm**

Output:

-  Mechanical cycles per hour **1,200**
-  Max. punched sheets per hour **20,000**

All performance outputs are based on 80 gsm paper and may vary depending on the product type, the working environment and the operator. For best punching results we recommend a paper thickness of 2.0 - 2.5 mm.

⁰⁰Dependent on the die type.

Strong and reliable German engineered punching dies with a working width of 340 mm. Available in a wide range of different punch patterns.

Simple vertical loading system for quick and effortless die changes.

QSA (Quick Size Adjustment) technology allows the quick cancellation of punching pins without the need to remove the die.

The depth gauge feature allows the operator to adjust the punched hole margin from 2 mm to 4,5 mm⁽¹⁾. This adds strength to the bound edge.

MBS module holding plate

required when using the WBS 360, PBS 340 and CBS 340 as standalone machine. You can increase productivity with two operators being able to complete the job; one punches and one binds.

SC pliers

should be used to cut and crimp metal spirals.
