

600i BOOKLET SYSTEM

INTELLIGENT PRODUCTION MADE EASY

Fully automatic setup Fast and intuitive controller Tool less operations A4 landscape format

A4 Landscape Brochures, Catalogues, Corporate and Financial Reports, Menus, Photobooks, Magazines, Newsletters, CD booklets, Manuals

The fully automatic 600i Booklet System offers intelligent versatility and precision to both Offset and Digital printers.

Combining the high speed intelligent DSC-10/60i Collator Towers and the easy to use DBM-600 Bookletmaker and Trimmer provides the operator with the ability to finish booklets of all sizes including A4 Landscape.

Superior Feeding

AMS System

High speed and intelligent DSC-10/60i suction towers deliver superior performance whilst maintaining complete accuracy. Each 10 bin tower comes with A.M.S.+ (Air Management System Plus) as standard. Controlled from the PC Controller and the towers, this unique feeding system manages the high power fans that create air flow and vacuum independently for each bin, enabling reliable feeding regardless of paper weight or size.

IMBF System

The DSC-10/60i includes I.M.B.F. (Intelligent Multi Bin Feeding) allowing the operator to select each bin individually and feed more than one sheet from one bin. Each bin is independent and can be optimised to feed single or multiple sheets, a huge benefit for variable data publications. The DSC-10/60i has a large bin capacity of 65mm and can increase the capacity to 130mm or more by intelligently linking multiple bins.

Ultrasonic Sensor Technology

Each bin on the DSC-10/60i Collator Towers can be equipped with the optional state-of-the-art Ultrasonic Sensor Technology. Each sensor detects if a double feed occurs regardless of ink colour, paper colour and paper density. This enables trouble free feeding of difficult paper such as black solid covers.

Automated Precision

The entire system is managed from the user friendly PC controller. This automatically sets up the system within 60 seconds and the changeover between jobs within 35 seconds, all without the use of any tools. The operator can create and save an unlimited number of jobs with ease for future instant recall and easily make any fine adjustments to 0.1mm accuracy whenever it is necessary.

Productivity

The 600i Booklet System finishes up to 5,200 booklets per hour. Adding the optional DKT-200 2-knife Trimmer increases this by up to 9,000 booklets per hour.

Its clear paper path allows the operator to be in full control of the production process. It enables full visibility and quick access to the job in progress. The whole system can be managed by a single operator and requires virtually no operator intervention.

Flexibility

The 600i Booklet System allows you to manage the printed pages from multiple printers, regardless of whether they are from colour or mono presses or different printer vendors. Merging together digital and offset sheets, uncollated and collated sets is possible without compromising print production, offering high speed professional finishing on a wide variety of sheet sizes and weights.

Up to 4 heavy duty Hohner heads or loop stitching heads can be installed to accommodate a wider range of finished applications.

Modularity

This highly versatile and modular booklet system can be re-configured and expanded as needs and demands change. Additional Collating Towers, Straight, Offset or Criss Cross Stacking and Jogging devices can be added at any time.

Options:

DKT-200 2-knife trimming

When connected to the optional DKT-200 Trimmer, the 600i Booklet System provides a completely automatic 1 (fore-edge) plus 2 (head and foot) knife trimming operation. This allows the user to take the printed SRA3 or B3 sheet directly from the press and finish the book in one operation, providing huge savings on guillotining and labour costs.

Gutter Knife

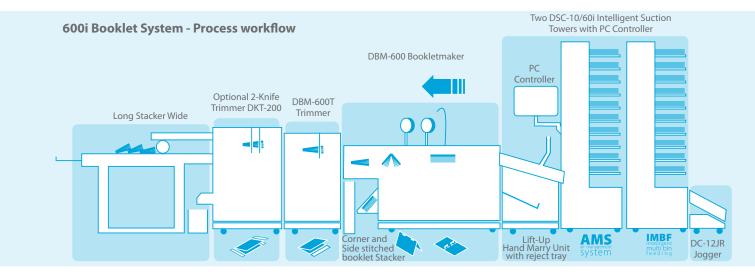

The optional gutter knife on the DKT-200 Trimmer enables the printer to finish a 2-up printed page, reducing downtime and doubling up the overall production.

Hole Punch

The hole punch option on the DKT-200 Trimmer is very useful for filing purposes.

ASM-600

Add value to your offering with the ASM-600 Square Spine by creating professional looking booklets with a perfect bound effect.
