

# AWB-320 Auto Wire Binder

## Wire Closers

The **AWB 320** – Auto Wire is the first Wire Binder that uses an auto size detector to automatically detect the wire size being used and then automatically sets itself to close, negating time consuming set up and adjustment.

Wires are held in position by use of a strong back magnet and textured jaws. Closing the jaws is triggered by a foot pedal or a touch button.

An ideal Wire closer for all environments.

## Features and Benefits

- **Closes all Wire sizes:** From 6mm (1/4”) to 38mm(1 1/2”)
- **Touch Screen operation:** Or optional foot pedal.
- **Integral Wire holder:** Allows all wire sizes to be held in place and loaded with pre punched paper.
- **Touch screen micro adjustment:** Should you need to close your chosen wire, more or less.
- **Magnetic back wall and textured closing jaws:** Ensure accurate placement and holding, during the closing process.
- **Built in safety sensor:** Protects against accidental closing on objects other than wires.
- **Lightweight and Portable:** Can be used as a standalone unit or placed on top of a flat top punch unit such as the Onyx Series.
- **Durable:** All Metal Construction.
- **Easy Operation.**

## Technical Specification

Dimensions	220mm (H) x 380mm (W) x 320mm (D)
Weight	12 kg
Power Requirements	230v 50Hz
Method of Operation	Foot pedal / touch screen
Safety Approvals	CE
Wire Capacity	6mm (1/4”) to 38mm (1 1/2”)
Narrow Cut	35mm
Binding Length	320mm (A4 Wire)
